

Eric Wang — Internship Summary

Product Operations Intern · Americas Product & Operations · May 2 – June 12, 2026 [Claude Code Usage](#)

Cleveland & Nashville Manual Captain Sourcing (Coco). Audit showed most 29 captains dormant while captain-shift demand ramped 10–20/mo → 143/mo; Cleveland: scored 100-Pros, 41 SMS sent, 3 applicants connected with RCs. Nashville: a; delivered a 40-Pro ranked interview list, 21 SMS, 4 applicants to RCs. Reevaluated [Pantry Captain Approval Score](#)

Captain Recruiting Automation — Captain Hub (Coco). End-to-end captain recruitment flow automated (application → performance review → RC pairing → interview → approval) [live here](#); 300 candidates already in the application pipeline, 5 Regional Captain logins provisioned, and RC territories rebalanced across 11,582 annual captain shifts to a 13.4% workload spread by region. Built the automated candidate-messaging pipeline (Mode → Django → in-app/Iterable) Candidates receive an in-app-chat AND email upon invites to apply and application status changes. Deployed a geo-radius auto-sourcing query built to remove Prod Ops from AM Captain Sourcing requests entirely

Account Manager Sourcing. 8+ AMs, 10+ requests, drivers. Helped Meg Cowee + Christian George (Fever, 3 requests), a Fever Nashville AM, Jennifer Lorie (Veyer), ADESA/Manheim drivers, IMT, plus 2 individual lookups. Highlights: emergency Jackson MS captain assigned 24 h before the event; ~130 driver-captain invites across 10 ADESA/Manheim cities; 3 Veyer de-facto captains applied and interviewed for Jennifer; flagged MVR enforcement off on all 25 Fever Candlelight companies despite driving requirements to Alex Vinden. These were all completed using the Captain Dashboard by myself, before it was fully built out for the AMs to takeover themselves

Drug Test PDFs → Google Sheet (Christine). Copied info from drug testing results google drive to google sheet, searching for their info like worderID and company through backend manually; Built an automated drug testing PDF parser .py job + name/workerID resolver: 76 PDFs processed with 96% auto-resolution to worker IDs using a Replit scheduled [automation](#) feature Input: Google Drive Drug Testing Certs; Output: name, test result, worker-id, date, origin company

Mode Spend & Seat Audit (Kenneth). 347 paid seats vs. 111 real users; delivered a 52-seat cut list + 183 viewer downgrades 3.46 TB/mo compute (+23% YoY; top 3 reports = 52.5%) 100 kazillion dollars saved (paid for my internship) [report suggest](#)

Levy Certs / Jotform (Christine). Executed cert + Jotform assignment across 74 Levy companies × 20 positions (176 cert assignments, 302 mandatory rows, 74 Jotforms) on 5/05, then fully reverted on 5/12 due to Brainshark email affecting fill rate (see training app MVP)

AI Agent Suite. Created MVP of [training app](#) allowing Partners to create their own training using built in tools like Google Slides/Forms; .zip code sent to Christine; Redesigned the [Agent Suite Website](#) to have a 3d interactive [hero page](#);

Boson Robotics (Helena). Researched 142 Chicago orgs → 100 curated leads; 70 emails sent day 1; 20+ interviews in 3 days → [1 recorder hired \(Claire Factor\)](#) (no shows not incl). Recorded 4 hours of video Shipped an [SMS tech-support Finch chatbot](#) for the recorders in #boson-pros, removing reliance on 3 staff members' personal numbers. (nobody really uses it yet because we need the next batch of headsets + inexperienced Pros launched)

IRL Mechanical Engineer Recruiting (Cadi). Sourced 74 candidates via Stanford/Berkeley lab mining, Indeed posts, Handshake posts; [collected 29 resumes](#) and AI-screened 19 → [9-person shortlist](#).

Lunch & Learns. [Instawork YC S15 Lunch & Learn deck](#), [Motorsports Lunch & Learn](#)

Assembly. Received 50 points from Enkhjin 🙏 for requesting ~100 pros onto shifts manually on django, received 26 points from Helena 🙏 for helping pickup Recorder Pros from the lobby and handling data ingestion, broken gloves, ect when Andrew wasn't available
